

The **Graduate School** of the
"Research Institute for Cognition and Robotics - CoR-Lab" offers

Scholarships for PhD students and Postdocs.

The CoR-Lab has been established at Bielefeld University, Germany, as a research centre for intelligent systems and human-machine interaction. The CoR-Lab forms a strategic partnership between Bielefeld University and the Honda Research Institute Europe GmbH, Germany. It will pursue fundamental research in the field of cognitive robots and intelligent systems, where the Honda humanoid robot ASIMO is available as an advanced technological platform. A particular focus of the CoR-Lab will be the interdisciplinary integration of expertise in engineering, computer science, brain science, and cognitive sciences, including the humanities and social sciences.

The **Graduate School** that is associated with the CoR-Lab provides an exciting and stimulating environment for enthusiastic students and creative postdocs, allowing them to pursue research in international teams in close collaboration with an industrial research institute. We invite applications from students and researchers who hold an academic degree (MSc/Diploma/Ph.D.) and share our dreams. Fluency in English is required.

A complete **application** should include certificates and transcripts of records of the completed course of studies, a CV, a cover letter providing information about the qualification and the motivation to do research in the Graduate School, as well as a short description of the research interests with regard to the research areas of the Graduate School (for more information see: www.cor-lab.de).

Please send your application until 30 November 2007 (preferably in PDF format) to the Managing Director of the Graduate School:
