

APPLY NOW!

Three-year Doctoral Program

Deadline: 15 January 2009

Berlin School of Mind and Brain (www.mind-and-brain.de)

The Berlin School of Mind and Brain is an **international graduate school** offering a three-year doctoral program in English. The school is based in Berlin and part of an extensive neuroscience landscape.

The focus of the school's research is on the **interface of humanities and behavioral sciences with neurosciences** (philosophy, social sciences, linguistics, behavioral and cognitive psychology, neurophysiology, psychiatry, neurology, computational neuroscience, neurobiology).

All doctoral students will receive **supervision by two professors**, one from the 'mind sciences', and one from the 'brain sciences'.

The school's main research areas are: 'Conscious and unconscious perception', 'decision-making', 'language', 'brain plasticity and lifespan ontogeny', and 'mental disorders and brain dysfunction'. **The school especially welcomes applications for the research areas 'brain plasticity & lifespan ontogeny', 'mental disorders & brain dysfunction', and 'philosophy of mind'!**

Scholarships

The school offers a number of scholarships. Scholarships are generous, and they will cover university enrolment fees and living expenses in Berlin (including accommodation, subsistence, insurances, public transport).

Tuition Fees

Humboldt-Universität zu Berlin does not charge tuition fees for this program!

Requirements for Applications

We are looking for students with a Master's or Diploma degree (research degree) in philosophy, linguistics, psychology, neurology, psychiatry, computer science, biology, law, economics, or another field relevant for mind/brain research. **Students can apply to the doctoral program while completing their Master's course!**
